

MARK NADER KAMAL

React Developer | Front-End Developer

Cairo, Egypt | +20 128-561-8837 | marknks123@gmail.com

linkedin.com/in/mark-nader | github.com/MarkNader10

CAREER OBJECTIVE

Passionate and detail-oriented **React Developer** and Computer Science student with a strong foundation in front-end architecture, modern JavaScript (ES6+), and responsive web design. Skilled in building single-page applications using React, Vite, React Router, and state management techniques. Seeking to contribute clean, maintainable code to a dynamic web development team.

EDUCATION

Modern Academy for Computer Science

Bachelor of Science in Computer Science

Cairo, Egypt

Oct.2024 – Present

EXPERIENCE

Software Quality Assurance Trainee

Digital Egypt Pioneers Initiative (DEPI)

Jul.2026 – Present

Cairo, Egypt

- Applied ISTQB testing principles and quality assurance standards to inspect UI components and verify functional behavior.
- Designed and executed manual test cases, documented bug reports, and analyzed software requirement specifications (SRS).
- Collaborated with agile team members using Jira for defect tracking and Git for version control.

React.js Web Developer Trainee

IT Gates Academy (University Summer Training)

Jul.2026 – Aug.2026

Cairo, Egypt

- Completed intensive university training focused on front-end web development using React.js, JavaScript (ES6+).
- Built dynamic, responsive user interfaces using functional components, React Hooks, React Router, and state management.

COURSES & CERTIFICATES

The Ultimate React Course: React, Redux & More

Comprehensive Online Course (Jonas Schmedtmann)

Aug.2026

- Mastered modern React.js concepts including Custom Hooks, Context API, Redux Toolkit, and Performance Optimization.
- Gained hands-on experience in building Single Page Applications (SPAs) with complex state management and REST API integration.

SKILLS

Frontend Technologies: React.js, JavaScript (ES6+), HTML5, CSS3, CSS Modules, Vite, Bootstrap, Tailwind CSS

State & Routing: React Router, Context API, Hooks (useState, useEffect, useReducer)

Programming Languages: JavaScript, C++, Java, SQL

Tools & Version Control: Git, GitHub, VS Code, Postman, Jira, npm/yarn

Testing & Quality: Software Testing Fundamentals, ISTQB Principles, Manual Testing, UI Inspection

PROJECTS

E-Commerce Web Application | *React, Vite, CSS Modules, React Router*

Jul.2026 – Aug.2026

- Designed and implemented a responsive single-page web application featuring dynamic routing and layout persistence.
- Managed global cart state seamlessly using React Context API and optimized build performance with Vite and CSS Modules.

Edu4U Educational Web Platform | *JavaScript, HTML5, CSS3, PHP, MySQL*

May.2025 – Jun.2026

- Designed the full front-end UI/UX architecture for an LMS platform simulating course enrollment and user profile dashboards.
- Engineered interactive UI features including dynamic Dark/Light theme switching, bilingual (Arabic/English) localization, and backend integration.
